

**Renewable Energy Systems Americas Inc. Announces
Commissioning of Two Wyoming Wind Projects**
*Projects to produce 99 MW and 28.5 MW of emission-free,
renewable energy in Albany and Carbon Counties.*

BROOMFIELD, CO –Today Renewable Energy Systems Americas Inc. (RES Americas), a national leader in the development and construction of wind power projects, announced the commissioning of two wind projects in the State of Wyoming - High Plains and McFadden Ridge I. The projects, located in Albany and Carbon Counties, will provide a total of 127.5 megawatts (MW) of renewable resource capability to PacifiCorp.

RES America Construction, Inc. served as the balance-of-plant construction contractor. PacifiCorp, an electric utility serving 1.7 million customers in six Western states as Rocky Mountain Power and Pacific Power, is the developer, owner and operator of the projects.

The High Plains Wind Project (99 MW) consists of 66, 1.5 MW turbines.

The McFadden Ridge I Wind Project (28.5 MW) consists of 19, 1.5 MW turbines.

“RES Americas is proud to contribute to the sustainable energy and economic future of Wyoming,” said Andrew Fowler, Vice President, Construction of RES Americas. “Wind and other renewable energy sources are vital components to a secure energy future, which also provide economic benefits to communities through property taxes, jobs, and other local revenues.”

For more than a decade, RES Americas has been developing, constructing, owning and operating renewable energy projects. The company employs over 200 full time professionals located throughout North America working on a project portfolio of over 12,500 MW dedicated to securing a sustainable energy future in North America.

###

About RES Americas: Renewable Energy Systems Americas Inc. (RES Americas) is a fully-integrated renewable energy company that develops, constructs, owns, and operates projects across the United States (US), Canada, Mexico and the Caribbean. RES Americas has constructed more than 3,500 MW, which represents approximately 14% of the operating installed wind capacity in the US, and has over 12,500 MW in development. RES Americas’ corporate office is located in Broomfield, CO with regional offices located in Austin, TX; Portland, OR; Minneapolis, MN; and Montreal, Quebec, Canada. RES Americas continues to seek new locations for wind and solar projects as well as opportunities to participate in other forms of renewable energy. For more information, please visit www.res-americas.com.

About PacifiCorp: PacifiCorp is one of the lowest-cost electric utilities in the United States, providing safe and reliable service to 1.7 million customers as Rocky Mountain Power in Utah, Wyoming and Idaho, and as Pacific Power in Oregon, Washington and northern California. The company works to meet customers’ growing energy needs while protecting and enhancing the environment. PacifiCorp has more than 13,257 megawatts of generation from coal, hydro, natural gas, and renewable wind and geothermal power. For more information, visit www.pacificorp.com.
