

A controls and EMS platform that links users and their assets, ensuring dynamic operations in a changing world

Revenue stream and dispatch flexibility, with experience across 10 markets globally

Future-proofed design, with storage ready solar controls and storage augmentation built in

Fleet level management, standardizing the interface across your assets

RESolve® is the culmination of:

- » 21GW of project portfolio
- » Over four decades of experience
- » A proven safety management program
- » A globally united workforce

THE **RESolve**® ADVANTAGE

RESolve® controls are customized to meet the demands of any customer. They are bolstered by RES' industry leading expertise in development, engineering, construction, operations, finance and project ownership. It is a controls platform developed with the needs of the entire project and portfolio lifecycle in mind.

As a technology agnostic solutions provider, RESolve® is uniquely positioned to integrate and standardize the various technologies and vendors across your fleet. It provides a consistent operations experience and easily adapts to ongoing market changes.

Applications include

STANDALONE STORAGE

End to end control of storage facilities, from component integration to service dispatch. Flexible value stacking and advanced diagnostic functionality to ensure your storage assets have the highest levels of performance.

HYBRID SOLAR + STORAGE

RESolve supports both DC and AC coupled architectures. When DC coupled RESolve enables advanced control such as DC clipped energy capture. As an AC coupled facility RESolve gives the ability to control the assets separately or as a combined facility, delivering flexibility in your offtake.

FUTURE PROOF SOLAR

Delivering a solar power plant controller with the full functionality of a hybrid system built in from the start. Keeping your solar assets flexible to adapt when storage can enhance project returns.

FLEET

RESolve unifies your fleet, bringing the control, dispatch and monitoring of your entire fleet in to 1 location. Cloud enabled, supplier agnostic and with the flexibility you need to scale.

Future Flexibility

RESolve® is built for the future with flexible features today and an architecture that allows for delivering value in the grid of tomorrow.

Native scheduling and value stacking grants users flexibility in how your assets interact with markets or create value.

RESolve® makes adding new control modes simple and worry free through its architecture. It allows functionality to be added without interfering with the complexities of site integration.
